Rexroth Bosch Group

Bosch Rexroth is one of the world's leading specialists in the field of drive and control technologies. Under the brand name of Rexroth the company supplies more than 500,000 customers with tailored solutions for driving, controlling and moving. As The Drive & Control Company, Bosch Rexroth develops, produces and sells components and systems in more than 80 countries in the technology fields Electric Drives and Controls, Industrial Hydraulics, Mobile Hydraulics, Linear Technology, Assembly Technology and Pneumatics.

SIEMENS

From A to Z, Siemens is the world's single-source leader of automation technology products engineered and manufactured for all industrial sectors

Danfoss

Danfoss expands in several sections within industry & marine applications. Some of the product ranges are: Refrigeration and A/C, Heating, VLT Drives, Solar Energy, Industrial automation, High pressure systems, Water control. CMA is specialized in industrial automation. Specifically at solenoid valves, coils, pneumatically operated valves, thermostatic valves, pressure transmitters, pressure switches (and differential), temperature sensors, switches (and differential) accessories & spare parts.

KLAY-INSTRUMENTS

Klay Instruments b.v. is an ISO 9001-2000 certified company who develops and manufactures a wide range of electronic Pressure and Level transmitters, "Intelligent" transmitters with HART® protocol or Profibus PA and pressure and level switches.

Distribution & Cooperation companies & services

SMC, the world leading Company in pneumatic products for industrial automation and mechanisation, is continuously developing and introducing new products to the market. SMC invests heavily, both financially and in engineering resources for future research and development.

PR product range covers a wide variety of functions within signal conditioning such as displays, Ex barriers, field mounted Ex transmitters, frequency/pulse converters, trip amplifiers, isolation amplifiers, calculators, controllers, signal converters, power supplies, temperature transmitters, valve controllers, etc

ControlAir Inc. is a leading manufacturer of precision air pressure regulators, I/P transducers, E/P transducers, P/I transducers and frictionless diaphragm air cylinders.

LUMEL S.A. is one of the leading European manufacturers of electrical devices for automation and high pressure aluminium castings. They have been in the market since 1953. Main Production range of automatic devices for measurement, converting, regulation and registration, transmission and visualization of various industrial process.

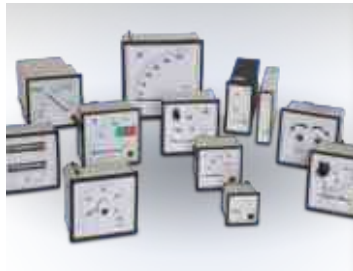

Distribution & Cooperation companies & services

FESTO

FESTO the right solution for every requirement: Festo offers products, systems and services surrounding pneumatic and electrical control and drive technology.

celsa

CELSEA instruments GmbH is one of the world's leading suppliers of measuring instruments. Our product portfolio includes a wide spectrum of products: Analogue instruments, digital instruments, Cts, Transmitters, Shunts, Meters Switches/Switch position indicators, Alarm panels.

DEIF

-power in control

DEIF is a global supplier of green, safe and reliable control solutions for decentralised power production, marine & offshore and wind turbines.

NIVELCO

Efficient industrial production relies on the information provided by modern high technology sensors and instrumentation. In the 1980's the whole sensor manufacturing industry was radically changed by developments in microprocessors and electronics. NIVELCO achieved the significant market position it holds today by recognising these developments.

Distribution & Cooperation companies & services

Uni -Safe covers all aspects of maritime safety - for both commercial traffic as for recreational sailors. There is not only professionally and longstanding seamanship - but also business acumen behind the country's largest wholesale company in maritime safety - Uni -Safe. Uni -Safe has a position as the leading supplier of rescue equipment and inflatables for both professional and military users as for boaters.

Parker's engineering expertise spans the core motion and control technologies – Aerospace, Climate Control, Electromechanical, Filtration, Fluid & Gas Handling, Hydraulics, Pneumatics, Process Control and Sealing & Shielding.

BRANNSTROM product range of today involves systems, within areas reaching from marine pollution control systems (ODMCS), to landbased papermill in-line monitoring systems.

KELLER in Europe is the largest manufacturer of industrial pressure transmitters. Their range of products is exclusively pressure transducers & transmitters from 5mbar up to 2000bar.

Distribution & Cooperation companies & services

ED Engineering based Company was established over twenty-five years ago to satisfy specific high reliability GAS DETECTION requirements, it has since expanded into FIRE DETECTION, and GENERAL HAZARDOUS AREA equipment.

Young Tech makes Positioner with accumulated Technique as the best of Control Valve trade during 20 years in Korea. A leader in the design and manufacture of Positioner, Young Tech had began to produce Positioner, Volume Booster and Position transmitter for the first time in Korea.

SAMI INSTRUMENTS, has been part of the international market for more than 40 years in the field of pneumatic instrumentation applied to Oil & Gas, chemical and petrochemical plants, the food industry, thermoelectric power plants and shipbuilding.

Beijer Electronics is the world's largest independent developer of HMI (Human-Machine Interface) technology. With our intuitive operator panels and information software, users worldwide communicate easily with the machines and processes they control.

Distribution & Cooperation companies & services

OMRON

Omron's Sensing and Control technologies make it possible to extract necessary data from a vast range of detected information, such as movement, location, biometrics, facial expressions, and environmental conditions, and convert this data into highly valuable information, based on which, machines can be precisely and optimally controlled and programmed to make automatic judgments with a degree of sophistication that approaches that of humans.

ABB

ABB is a global leader in power and automation technologies. Their solutions improve the efficiency, productivity and quality of their customers' operations while minimizing environmental impact. Innovation is at the forefront of what they do and many of the technologies that drive modern society were pioneered by ABB.

 **Telemecanique**
GROUPE SCHNEIDER

From steel in the 19th century, to electrical distribution and automation in the 20th and energy management in the 21st, Schneider Electric has always been driven by an international, innovative and responsible mindset to shape the transformation of the industry it was evolving in.

VACON
DRIVEN BY DRIVES

Vacon is driven by a passion to design, manufacture and sell only the best AC drives on the planet — and nothing else. AC drives can be used to control electric motors or to help generate power from renewable sources. Vacon has R&D and production facilities in Finland, the United States, China and Italy, and sales offices in 27 countries.

Distribution & Cooperation companies & services

From industrial processes and chemicals through shipbuilding to building management: ARI can look back on a tradition of more than 50 years as a competent partner for control - isolation - safety - steam trapping of liquid and gaseous media. Ari manufacture high-quality, heavy-duty valves in line with the latest standards at three different locations - all of them in Germany.

Green Instruments A/S is a global company that specializes in measurement and analysis technologies for both marine and land based industries. They produce and install instruments and control equipment for emission control, gas analysis, hazard detection, and machinery protection.

NABCO is a highly diversified, mechanical, electrical, and service contracting firm established in 1974. As a company, we are committed to providing you with cost-effective solutions to industrial and commercial mechanical and electrical concerns through a modern approach.

FLOWERVE is a leading manufacturer and aftermarket service provider of comprehensive flow management products and services. Our solutions help move, control and protect the flow of materials in critical industries around the world.

HAE WON INDUSTRIES COMPANY

HAE WON INDUSTRIES COMPANY (West Sea Co., Ltd.) is a manufacturer and supplier of Pistons, Piston Crowns, Piston Skirts, Piston Rods, Cylinder Covers and other marine diesel engine components. We manufacture and supply mainly large diesel engine parts (Maker : MAN B&W, Sulzer, Etc.)

Distribution & Cooperation companies & services

Eugen Seitz AG is an independent, family-owned company with more than 50 years of history. Since 1958, we have been developing, producing and distributing premium valve technology all over the world for the technically demanding solenoid valve market from our head office in Wetzikon, Switzerland. Our primary focus is on developing solutions for gaseous media in the medium and high- pressure range of 16 to 1,000 bar.

Mt.H has abundant experience and various achievements of safety relief valves and control valves for protection and safety in industrial plant projects and marine services and Mt.H also has consulted, provided, produced and supplied these valves to our customers with frontier spirit and business philosophy since 1978.

BOILER PARTS

SUNFLAME

VOLCANO

CMA are the proud authorized spare parts agents for Saacke, Sunflame, Volcano and Landis & Gyr in several markets. Additionally, we provide parts for most other marine boilers such as TPK, Aalborg, Sunrod, Kangrim, Clayton, Osaka, Mitsubishi, Miura and burner plants such as Volcano, Vesta (KB) and others.

Distribution & Cooperation companies & services

CONSTRUCTIONS & REPAIRING SYSTEMS

CMA it is not only a reseller company. We manufacture temperature sensors (PT100, Ni/Ch, PT1000 etc.) according to customers needs for industrial applications, as also we do maintenance for various automation applications.

- Level Switch

- Temp Sensors

- Oil Mist Detectors

- Oxygen Analyzer

- Nakakita

- Electropneumatic Controller
